

RADIOGRAMOPHONE MODEL-101 A(B)

R I G A 101 S - R I G O N D A

Range Switch in position corresponding switched-on
MW Range

- 2 Resistors and Capacitors marked by * may differ from those shown in circuit
- 3 Resistor values marked by M* are expressed in meg, by K in kohm, and without letter - in ohm
- 4 Capacitor values marked by whole numbers - in pf and by decimal - in μ F
- 5 Operating conditions in N₂ U1/U3 are measured by d.c. valve voltmeter and those in U4, U5, U6 - by universal tester. Operating conditions of all transistors measured relative to chassis.
- 6 In Riga-103B* circuit U1B Unit is used instead of U1A Unit and components of U3 Unit put in brackets
